maximum distance in the group of papers

use ranking to evaluate

minhash clustering not author clustering

build a web application of google search

龚梓博粑粑傻逼
make txt:
1. authorID \t ave_cit
2. paperID \t #citaiton \t sum(ave_cit^2)/num

李阳：
1. 提取与 input 距离为 n 的所有 paperID
2. box plot

翔哥最牛逼：
1. mutual friend

gsutil cp (-r) gs://result_output/xxxx ./
